

DEPARTMENT OF

APPLIED PLANT SCIENCE

Where to Start:

1. Meet with the department chair within the first two weeks of your first semester if you have transferred credits from another university or college.
2. Join one of the department student [societies](#): Metus Topiaria Gardening Society, Ag Tech Society, or Agronomy.
3. Meet with your faculty academic mentor during your first semester.
 - Sign in to <https://my.byui.edu/ics> and look for information under the “Student” tab in the Academic Summary section.
4. Start thinking about what types of experiential learning opportunities you want to have related to [internships](#). Many employers now want students to have two or more internships before graduation.
5. Complete your [I-Plan](#).
6. If you have questions regarding classes, contact your Academic Advisor in the College of Agriculture and Life Science: (208) 496-9830 or calsadvising@byui.edu

Feel free to contact me if you have any questions about your major or coming to BYU-Idaho. I look forward to meeting you soon!

Take care,
Ross Spackman, Ph.D.

Ross Spackman

DEPARTMENT CHAIR

SPACKMANR@BYUI.EDU

Welcome to the Department of Applied Plant Science! The faculty in the department are excited to welcome you to Brigham Young University – Idaho. The majors include: 1. Horticulture 2. Plant Science and Technology. We have a diverse group of students with many interests including production and care of plants, floral design, landscape design, soil, water quality, precision agricultural technology, and pursuit of Masters of Science degrees. Graduates of our programs continue to be in high demand by employers and we foresee the demand to remain strong.

Faculty incorporate greenhouses, nurseries, agricultural land, shop areas, and laboratories into their classes to help students get hands-on immersive experiences liberally blended with gospel principles. Much of the learning will take place in the classroom and through personal study.
